See Continuation Sheet

Part III.

☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

Status of Application: _____

(3) _____.

(4) _____.

Time: _____

//Jenna-Leigh Johnson/
Primary Examiner, Art Unit 1794

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: Discussed amending claim 11 since the application integral to mean the fibers originate from the first precursor web as distinguished from the fibers introduced to or added to the precursor web (specification, page 7). Which would indicate that the fibers recited in claim 11 recited as being neither integral nor extending from the first precursor web, cannot have originated from the original precursor web, but should be introduced or added to the precursor web in a separate step. Thus, the claim was amended to recite the fibers are broken from and not extending from the precursor web as described on page 15 of the specification to clarify the fibers come from the first precursor web. .
